NURSING

Associate Degree Nursing (ADN)

Preparation for RN

(CIP 51.3801)

Associate of Applied Science

The Associate Degree in Nursing (ADN) is a two-year program which prepares graduate professional nurses to utilize clinical judgment to provide safe, evidence-based and patient-centered care for the benefit of the community. The graduate of the WCJC ADN program is prepared to meet the differentiated essential competencies (DECs) at the associate degree level as defined by the Texas Board of Nursing in four major roles: member of the profession, provider of patient-centered care, patient safety advocate, and member of the health care team. General education courses as well as nursing courses are included in the curriculum and are transferable to many four-year colleges that offer baccalaureate degrees in nursing.

Upon successful completion of the program, graduates are qualified to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

The program is approved by the Texas Board of Nursing (BON). The program is fully accredited by the National League of Nursing Commission for Nursing Education Accreditation.

Prerequisite Courses – Coursework must be completed prior to applying to the program.

| BIOL 2401 | Anatomy & Physiology I |
|-----------|-------------------------|
| PSYC 2301 | General Psychology |
