PURPOSE:

In compliance with federal regulation relating to the issuance and dissemination of a Drug and Alcohol Abuse Prevention Policy, this brochure is updated and posted online annually for all employees and all students.

POLICY/PENALTIES:

REGULATION NO: 592

Section IV. Policy:

A. The college recognizes the necessity of establishing guidelines for conduct to insure the protection of rights for the individual and for the college as an educational institution. In addition to other formal rules and regulations, the following statements adopted by the college apply to all individuals of the college community, as well as its guests.

Section V. Guidelines:

A. Provisions of this regulation apply to student behavior on campus and at all college sponsored and college approved activities and events.

B. All students shall obey the law, show respect for College administration, faculty, staff and employees, and shall observe correct standards of conduct. In addition to activities prohibited by law/or other College policies or regulations, the following types of behavior shall be prohibited and subject to disciplinary action, including but not limited to, possible dismissal from WCJC dormitories and/or the college:

1. Gambling, dishonesty, or the use of alcoholic beverages on campus or at any college sponsored event.
2. The illegal use, possession, and/or sale of a drug or narcotic on campus, as those items are defined by the Texas Controlled Substances Act.

REGULATION NO: 513

Section IV. Policy:

D. Alcoholic beverages are not permitted in residence halls or on college property.

REGULATION NO: 375

Section III. Policy:

A. Tobacco product use is not permitted in any WCJC building including students’ and supervisors’ rooms in residence halls. Tobacco product use on campus is only permitted on a college parking lot or designated areas.

B. Violators of this policy are subject to a summary citation and fine under the same terms and conditions as specified for parking tickets (see Regulation 315, Parking, and Regulation 325, Summary Appeals Court). (POLICY APPROVAL: 1-10-96, rev. 1-20-98, Board of Trustees; amended 3-17-09, amended 6-23-15)
REGULATION NO: 878

Section I. Purpose:

Wharton County Junior College (WCJC or College) is committed to protecting the safety, health, and well-being of its employees, students, and all people who come into contact with WCJC employees, property and facilities. The College's philosophy is that unlawful use of drugs or abuse of other authorized drugs and alcohol is inconsistent with the behavior expected of members of the College community. The use of illegal drugs by College employees can result in less than complete reliability, stability and good judgement. The College is committed to providing an environment that prohibits any influences that might have a detrimental effect upon the orderly, safe and efficient operation of the College and that prevents the possibility of coercion, influence, and irresponsible action under pressure by employees that may pose a risk to health, safety, and the College’s educational mission. Based upon these goals, the College requires that its employees report for work and perform their duties within the standards established. The intent of the following policy is to prevent the hiring and/or continued employment of persons who, due to the use of alcohol or illegal drugs, may harm themselves or others, or cause damage to property. WCJC, recognizing this, is committed to providing a drug and alcohol-free working environment for all of its employees.

WCJC’s Drug-Free Workplace policy is based on the following objectives:

1. To maintain the good reputation of the College and its employees within the communities where the College components are located;
2. To minimize accidental injuries to persons or property;
3. To minimize absenteeism and tardiness and improve the effective job performance and productivity of all employees;
4. To comply with the federal Drug-Free Workplace Act of 1988, and the Drug-Free Schools and Communities Act Amendments of 1989; and
5. Other applicable legislation as they are enacted.

Section II. Policy:

A. Scope

WCJC prohibits the following when an employee is on the job, on College property, in a vehicle owned or used for College business, or while representing the College;

1. The College prohibits the illicit use, sale, attempted sale, conveyance, distribution, storage, manufacture, cultivation, dispensation, purchase, and possession of illegal drugs, intoxicants, or controlled substances, at any time and in any amount, or in any manner, in the workplace during and after business hours. Illicit drugs include all drugs for which possession is illegal under federal or state law, including prescription drugs for which the individual does not have a valid prescription.

2. The College prohibits the use of prescription medications for which the employee does not have a valid prescription, and the use of prescription medication in a manner inconsistent with the prescription, in the workplace during and after business hours. (Exception: An employee who uses a drug authorized by licensed physician through a prescription specifically for that employee’s use.)
3. The use of alcohol and intoxicating beverages shall be prohibited in classroom buildings, laboratories, auditorium, library buildings, faculty and administrative offices, intercollegiate and intramural athletic facilities, and all other public campus areas. However, with the prior consent and approval of the College President, the provisions may be waived for specified culinary instructional programs or with respect to any specific event that is sponsored by the College and/or the Wharton County Junior College Foundation. State law shall be strictly enforced at all times on all property or facilities controlled by the College in regard to the possession and consumption of alcoholic beverages. All other possession, consumption, or use of alcoholic beverages or illegal drugs shall be prohibited on College property or facilities. Any person who appears to be under the influence of intoxicating liquor or drugs shall be denied access to and/or the use of College property or facilities.

4. Employees shall report suspected violation of this policy to their immediate supervisors or to the Human Resources Department.

B. Employee Notification -
A copy of this policy will be distributed to all new employees. This policy is contained in the WCJC Employee Handbook, and is available on the WCJC Intranet for review by all employee. Employees will be notified annually that WCJC has an official Drug-Free Workplace /Drug and Alcohol Abuse Policy that must be adhered to by all employees, at all time.

C. Disciplinary Action -
Any employee admitting to, or convicted of, the unlawful possession, use or distribution of illicit drugs and alcohol on the campus or at a college-sponsored event held off campus will be subject to disciplinary action (up to and including suspension without pay, and termination); may be referred for prosecution; and/or may be required to satisfactory participation in a drug and alcohol treatment or rehabilitation program.

Section V. Procedures:

C. Alcohol and Drug Referrals and Services -
The College is committed to providing alcohol and drug education as well as early intervention and referral services.

1. WCJC’s Human Resources Department will provide services for campus faculty and staff that include information and referral. The Human Resources Department staff, within the framework of state and federal laws, will maintain confidentiality of all inquiries regarding alcohol and drug abuse issues, to the extent permitted by law.

2. Services can also be sought independently through local service organizations within the community, such as the Houston Area Council on Alcoholism and Drug Abuse, and Alcoholics Anonymous, etc.

3. Community service hospitals can also be contacted for emergency care.

D. Disciplinary Action for Violation of Drug-Free Workplace/Drug and Alcohol Abuse Policy

1. Any employee who violates the College’s prohibition against working while impaired by any drug or alcohol, lawful or unlawful, except with supervisory approval, will be subject to disciplinary action, up to and including dismissal.
Section V. Procedures: (continued)

2. Any employee who is convicted of or otherwise caught possessing, using, manufacturing, storing, dispensing, distributing, or selling any illegal drug or alcohol in the workplace in violation of the College’s policy prohibiting such conduct may be immediately discharged. Employees must report any conviction involving illicit drug use or use or possession of an illegal or controlled substance no later than five days after such conviction to the Human Resources Department.

3. Any employee who is convicted of off-duty illegal drug-related activity, including use, possession, storage, manufacture, dispensation, distribution, or sale of drugs, or who otherwise is determined to have engaged in off-duty illegal drug-related activity, will be considered to be in violation of the College’s Drug-Free

REGULATION NO: 878

3. Workplace/Drug and Alcohol Abuse policy and may be suspended, terminated, or subjected to other discipline by the College. Employees must report any conviction of illicit drug use or use or possession of an illegal or controlled substance no later than five days after such conviction to the Human Resources Department.

4. Any employees who pleads guilty to or otherwise is convicted of driving under the influence of alcohol and who, as an essential function of the employee’s job, operates a motor vehicle, machinery or other motorized equipment that could be dangerous to himself/herself or others, will be permitted to operate such vehicle, machinery or equipment until the employee has entered in and successfully completed a treatment or rehabilitation program. Additionally, to the extent an individual has his/her driver’s license revoked or suspended as a result of a conviction or guilty plea to driving under the influence of alcohol, he/she will not be permitted to operate such vehicles until the license is reinstated. The individual may be discharged or may be reassigned to another position during this time period, depending on the circumstances. At the College’s discretion, the employee may also be permanently barred from operating motor machinery, and/or equipment at the College.

5. Any employees who violates the College’s Drug-Free Workplace/Drug and Alcohol Abuse Policy but is not terminated must successfully complete a treatment or rehabilitation program offered by an outside provider. The employee will be required to attend this mandatory treatment or rehabilitation program at the employee’s expense. Failure to complete a treatment or rehabilitation program may result in disciplinary action, up to and including suspension or termination. If an employee is required to be absent from work to comply with this section, the College’s Family and Medical Leave Policy shall govern his/her employment rights.

E. Confidentiality Records

Drug and/or alcohol abuse is a particularly sensitive issue that may affect any member of the College community. To the extent permitted by the law, the expectation of confidentiality of all parties involved in a violation or alleged violation of the College’s Drug-Free Workplace/Drug and Alcohol Abuse Policy shall be strictly adhered to, insofar as it does not interfere with the College’s legal obligation to investigate allegations of drug and/or alcohol abuse in the workplace when brought to the College’s attention, and to take appropriate corrective action.

1. The Human Resources Department and the Payroll and Benefits Office, to the extent permitted by state and federal laws, will maintain confidentiality of all inquiries regarding alcohol and drug abuse issues. Records will be kept separate from personnel files and will be accessible only to authorized personnel.
Section VI. Guidelines:

1. An employee must report to their supervisor any use of a prescribe or over-the-counter medication that adversely affect his/her job performance.

REGULATION NO: 878

2. An employee must seek assistance for drug and alcohol problems before the problem leads to a disciplinary action.

3. An employee who is charged, and or convicted of a drug related offense that occurred in the workplace, on College property, in a vehicle owned or used for College business, at a college sponsored activity, or while representing the College, must notify his or her supervisor and the Human Resources Department of any criminal drug statute conviction for a violation occurring in the workplace no later than five (5) days after such conviction.

4. Employees shall report suspected violators of this policy to their immediate supervisors and to the Human Resources Department.

B. Supervisor’s Responsibility for Insuring Compliance with the Drug-Free Workplace/Drug and Alcohol Abuse Policy

1. An employee’s supervisor is responsible for ensuring their employees comply with this policy. Indicators of possible job performance problems that could be related to illicit drug usage include, but are not limited, to the following:

   a. An employee exhibiting unfit behavior, including drowsiness, sleepiness or sleeping, slurred and/or incoherent speech, unusually aggressive behavior, unusually depressive behavior, unusual and rapid changes in mood, disorientation or inability to concentrate and lack of coordination in walking or performing other tasks.

   b. An employee with indications of unsatisfactory job performance, including unexplained work errors, unusual difficulty in performing normal or routine duties, unexplained on-the-job accident, and unexplained on-the-job injury.

   c. An employee with a history of unsatisfactory job performance problems such as poor work performance, absenteeism, tardiness, minor injuries/accidents or other job difficulties.

   d. An employee exhibiting physical signs of alcohol and/or illegal drug usage such as glassy eyes or having an odor of alcohol or drugs.

2. An employee’s supervisor is responsible for making referrals of individuals, demonstrating unusual or erratic behavior, who are suspected of illegal substance or alcohol abuse to the WCJC Human Resources Department.

3. An employee’s annual performance evaluation will not be penalized if the employee experiencing problems resulting from drug or alcohol abuse or dependency seeks assistance before the problem leads to a disciplinary action. Job performance alone, not the fact the employee has identified him/herself as having sought assistance for their drug or alcohol abuse or dependency, will be the basis for performance evaluations.
C. The College’s Responsibility for Insuring Compliance with the Drug-Free Workplace/Drug and Alcohol Abuse Policy

1. The College may, to the extent permitted by the law, take appropriate personnel action against any employee who is convicted of a violation occurring in the workplace or may require the employee’s satisfactory participation in a drug treatment or rehabilitation program.

REGULATION NO: 878

2. Disciplinary action can range from warning to permanent separation/termination from the College, depending on the seriousness of the infraction and the degree to which violation of the policy adversely affects the well-being of the community or the fulfillment of the College’s educational mission.

D. Consequences for Violation of WCJC Drug-Free Workplace/Drug and Alcohol Abuse Policy

1. A WCJC employee who is found to have violated this regulation will be subject to discipline, up to and including termination.

2. An employee, in violation of the policy, will not be permitted to seek rehabilitation in lieu of discipline, but may be required to participate in rehabilitation as a condition of continued employment.

3. An employee’s decision to seek voluntary help, before found to be in violation of the College’s regulation, will not be used as a basis for disciplinary action. Cost of medical assistance with a drug or alcohol problem may be covered under the employee’s health insurance plan.

4. An employee who violates any local, state or federal laws may be reported to the appropriate law enforcement agency and may be subject to prosecution in accordance with the law. (Legal sanctions for violation of local, state, and federal laws may include, but not limited to fines, probation, and jail or prison sentences.)

IV. DEFINITIONS

A. Employee means an individual receiving a salary, wages, other compensation and/or stipend from the College, including all full-time, part-time, and contractors/subcontractors. On-call employees for on-call security employment in the College’s Facilities Management Department also are subject to this policy.

B. Illicit-drug use means the use of illegal drugs and the abuse of other drugs and alcohol.

C. Controlled Substances means a controlled substance in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812) as further defined by regulations at 21 CFR 1300.11 through 1300.15, and as defined in the Texas Controlled Substances Act (Texas Health & Safety Code, §481.00 et seq.)

D. Conviction means finding of guilt (including a plea of nolo contendere) or imposition of sentence, or both, by any judicial body charged with the responsibility to determine violations of the federal or state criminal drug and/or alcohol statutes.

E. College activities means an activity officially sponsored and sanctioned by WCJC, on or off school grounds.

F. Workplace means the physical boundaries of the College and facilities owned or controlled by the College. This includes any office, building, or property (including parking lots) owned or operated by the College, or any other site at which an employee is to perform work for the College. An employee is considered to be at a “work site” at all times when he/she is in or is responsible for a College vehicle while on College business.
PREVENTION OF DRUG AND ALCOHOL ABUSE

PHILOSOPHY

The unlawful use of drug or abuse other drugs and alcohol is inconsistent with the behavior expected of members of the college community. The college is committed to the development and maintenance of a drug-free environment on the campus as well as an environment that prohibits the abuse of other drugs and alcohol. WCJC has a drug and alcohol abuse prevention program system in operation, accessible to all members of the college community. The college is committed to the further explanation of that program and the dissemination of drug-awareness information to the member of the college community. In addition, the college is committed to enforcing the provisions of the Drug-Free Workplace of Act 1989 and believes that this act and its implementation regulations provide a proper framework for the drug and alcohol abuse policies of the college.

HEALTH RISKS

ALCOHOL - Alcohol consumption causes a number of changes in behavior. Even low doses significantly impair the judgement and coordination required to drive a car safely. Low in moderate doses of alcohol also increase the incidence of a variety of aggressive acts. Moderate to high doses of alcohol cause marked impairment of higher mental functions, severely altering a person’s ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol can lead to dependence. Sudden cessation of regular alcohol use is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life threatening. Long-term consumption of large quantities of alcohol can also lead to permanent damage to vital organs such as the brain and the liver. Females who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngster of becoming alcoholics. Alcohol use is often related to acquaintance rape and failure to protect oneself from sexually transmitted diseases (STDs). Additionally, alcohol related accidents are the number one cause of death in the 16-24 year age group.

DESIGNER DRUGS - Illegal drugs are defined in terms of their chemical formulas. To circumvent these legal restrictions. “underground” chemists modify the molecular structure of certain illegal drugs to produce analogs known as “designer drugs.” The drugs can be several hundred times stronger than the drugs they are designed to imitate. Many of the so-called designer drugs are related to amphetamines (MDMA, X). Bootleg manufacture creates overdose and contamination risks. These substances can product severe neurochemical damage to the brain. The narcotic analogs (fentanyl, china white) can cause symptoms such as those seen in Parkinson’s disease; uncontrollable tremors, drooling, impaired speech, paralysis, and irreversible brain damage. Analogs of amphetamines and methamphetamine cause nausea, blurred vision, chills or sweating, and faintness. Psychological effects include anxiety, depression, and paranoia. As little as one dose can cause brain damage. The analogs of phencyclidine (PCP) cause illusions, hallucinations, and impaired perception.

COCAINE - Cocaine stimulates the central nervous system. Cocaine use can cause death by cardiac arrest or respiratory failure. Its immediate effects include dilated pupils and elevated blood pressure, heart rate, respiratory rate, and body temperature. Occasional use can cause a stuffy or runny nose, while chronic use can ulcerate the mucous membrane of the nose. Sharing contaminated needles and syringes for injecting cocaine can spread the AIDS virus, hepatitis, and other diseases. Cocaine can produce psychological and physical dependency, a feeling that the user cannot function without the drug.
HEALTH RISKS

COCAINE (continued) - In addition, tolerance develops rapidly. “Crack,” or “freebase rock,” is extremely addictive; and its effects are felt within ten seconds. The physical effects include dilated pupils, increased pulse rate, elevated blood pressure, insomnia, loss of appetite, tactile hallucination, paranoia, and seizures.

OTHER STIMULANTS - Stimulants can cause increased heart and respiratory rates, elevated blood pressure, dilated pupils, and decreased appetite. In addition, users may experience sweating, headaches, blurred vision, dizziness, sleeplessness, and anxiety.

Extremely high doses can cause a rapid or irregular heartbeat, tremors, loss of coordination, and even physical collapse. An amphetamine injection creates a sudden increase in blood pressure that can result in stroke, very high fever, or heart failure. In addition to the physical effects, users report feeling restless, anxious, and moody. Higher doses intensify the effects. Persons who use large amounts of amphetamines over a long period of time can develop an amphetamine psychosis that includes hallucinations, delusions, and paranoia.

MARIJUANA (CANNABIS) - All forms of cannabis can result in negative physical and mental effects. Use of cannabis may impair or reduce short-term memory and comprehension, alter senses of time, and reduce ability to perform tasks requiring concentration and coordination such as driving a car. Research also shows that students do not retain knowledge when they are “high.” Motivation and cognition may be altered, making the acquisition of new information difficult. Marijuana can also produce paranoia and psychosis. Because users often inhale the unfiltered smoke deeply and then hold it in their lungs as long as possible, marijuana is damaging to the lungs and pulmonary system; marijuana smoke contains more cancer-causing agents than tobacco smoke. Long-term users of cannabis may develop psychological dependence and require more of the drug to get the same effect.

HALLUCINOGENS - Lysergic acid (LSD), mescaline, and psilocybin cause delusions and hallucinations. The physical effects may include dilated pupils, elevated body temperature, increased heart rate and blood pressure, loss of appetite, sleeplessness, and tremors. Sensations and feelings may change rapidly. Negative psychological reactions LSD, mescaline, and psilocybin are common. The user may experience pain, confusion, suspicion, anxiety, and loss of control. Delayed effects or “flashbacks” can occur even after use has ceased. Users of PCP report persistent memory problems and speech difficulties. Some of these effects may last six months to a year following prolonged daily use. Mood absorbers-depression, anxiety, and violent behavior also occur. In later stages of chronic use, users often exhibit paranoid and violent behavior. Large doses may produce convulsions and coma, as well as heart and lung failure.

DEPRESSANTS - The effects of depressants are in many ways similar to the effects of alcohol (which is itself a depressant). Small amounts can produce calmness and relaxed muscles; but somewhat larger doses can cause slurred speech, staggering gait, and altered perception. Large doses can cause respiratory depression, coma, and death. The combination of depressants and alcohol can multiply the effects of the drugs, thereby multiplying the risks. The use of depressants can cause both physical and psychological dependence. Regular use over time may result in a tolerance to the drug, leading the user to increase the quantity consumed. When regular users suddenly stop taking large doses, they may develop withdrawal symptoms ranging from restlessness, insomnia, and anxiety to convulsions and death.
HEALTH RISKS

**Synthetic Cannabinoids** - Synthetic cannabinoids refer to a growing number of man-made, mind-altering chemicals that are sprayed on dried, shredded plant material so they can be smoked (herbal incense). These chemicals are called cannabinoids because they are related to chemicals found in the marijuana plant. Because of this similarity, synthetic cannabinoids are sometimes misleadingly called “synthetic marijuana” (or “fake weed”), and they are often marketed as “safe,” legal alternatives to that drug. In fact, they may affect the brain much more powerfully than marijuana; their actual effects can be unpredictable and, in some cases, severe or even life-threatening. Texas State Legislature banned synthetic cannabinoids in 2015 so it is no longer sold in stores but is still widely available. Manufacturers sell these herbal incense products in colorful foil packages. They market these products under a wide variety of specific brand names; in past years, K2 and Spice were common. Hundreds of other brand names now exist, such as Joker, Black Mamba, Kush, and Kronic. Because the chemical composition of many synthetic cannabinoid products is unknown and may change from batch to batch, these products are likely to contain substances that cause dramatically different effects than the user might expect. Synthetic cannabinoids are highly addictive. People who have used synthetic cannabinoids and have been taken to emergency rooms have shown severe effects including: rapid heart rate, vomiting, violent behavior, and suicidal thoughts. Synthetic cannabinoids can also raise blood pressure and cause reduced blood supply to the heart, as well as kidney damage and seizures. Use of these drugs is associated with a rising number of deaths.

**Opioids/Heroin** - Opioids are a class of drugs that include the illegal drug heroin, synthetic opioids such as fentanyl, and pain relievers available legally by prescription, such as oxycodone (OxyContin®), hydrocodone (Vicodin®), codeine, morphine, and many others. Opioid pain relievers are generally safe when taken for a short time and as prescribed by a doctor, but because they produce euphoria in addition to pain relief, they can be misused (taken in a different way or in a larger quantity than prescribed, or taken without a doctor’s prescription). Regular use—even as prescribed by a doctor—can lead to dependence and, when misused, opioid pain relievers can lead to overdose incidents and deaths. An opioid overdose can be reversed with the drug naloxone when given right away. Prescription opioid pain medicines such as OxyContin® and Vicodin® have effects similar to heroin. Research suggests that misuse of these drugs may open the door to heroin use. Nearly 80 percent of Americans using heroin (including those in treatment) reported misusing prescription opioids prior to using heroin. People who use heroin over the long term may develop: collapsed veins, infection of the heart lining and valves, abscesses, constipation and stomach cramping, liver or kidney disease, lung complications. When people overdose on heroin, their breathing often slows or stops. This can decrease the amount of oxygen that reaches the brain, a condition called hypoxia. Hypoxia can have short- and long-term mental effects and effects on the nervous system, including coma and permanent brain damage.

**Methamphetamine** - Methamphetamine is chemically similar to amphetamine. Other common names for methamphetamine include chalk, crank, crystal, ice, meth, and speed. Taking even small amounts of methamphetamine can result in many of the same health effects as those of other stimulants, such as cocaine or amphetamines. These include: increased wakefulness and physical activity, decreased appetite, faster breathing, rapid and/or irregular heartbeat, increased blood pressure and body temperature. Long-term methamphetamine use has many other negative consequences, including: extreme weight loss, severe dental problems (“meth mouth”), intense itching, leading to skin sores from scratching, violent behavior, paranoia, and hallucinations. Methamphetamine overdose can lead to stroke, heart attack, or organ problems—such as kidney failure—caused by overheating. These conditions can result in death.

5. ASSISTANCE PROGRAM FOR EMPLOYEES AND STUDENTS

The WCJC Office of Student Services offers the following drug and alcohol abuse information, counseling and assistance programs and services:

1. Information and Referral: all members of the college community are eligible to consult with the professional staff of the Office of Student Services (OSS) regarding the availability of drug abuse assistance programs. Drug and alcohol abuse counseling and rehabilitation program referrals are routinely made to mutual-help organizations, private hospitals, public treatment programs, and private drug-treatment practitioners. It also maintains a collection of resource materials pertinent to issues of drug abuse.

2. Individual Counseling: Individuals are seen on a short-term basis for assistance with drug-related problems. The OSS will make a referral for alcohol and drug addiction. Referrals are available students at no charge. Faculty and staff are able to receive referrals for such services.

3. Group Counseling: Details regarding a local chapter of Alcoholic Anonymous (AA) are available from the OSS. Information is free to Wharton County Junior College students, faculty and staff.

4. Mutual Health Groups: Counselors may assist student in forming groups like Alcoholics Anonymous and Alanon, and information concerning these groups is available through the OSS for dissemination to interested persons.

5. Houston Area Council on Alcoholism and Drug Abuse: This organization offers short-term counseling for anyone affected in any way by alcohol or other drug abuse. Trained alcohol and drug-abuse counselors can help select a 12-step program (AA, Alanon, NA, CA, etc.) and/or appropriate treatment. The address is 303 Jackson Hill, Houston, Texas 77007, phone 942-4100.

Further information regarding these programs and services may be secured from the WCJC Office or Student Services located in the Pioneer Student Center, phone (979) 532-6441, in Sugar Land (281) 243-8422, or in Richmond (281) 239-1527.

6. APPLICATION POLICY

The Drug and Alcohol Abuse Prevention Policy is supported by a drug-free awareness and alcohol education program available to the faculty, staff, and students of the college. Specific compliance and reporting items listed below (Items B, C, D, E) are applicable to all persons employed on federal contracts and grants.

In support of this policy, the college:

A. Has established a drug-free and alcohol-free abuse-awareness program to inform its faculty, staff, and students about the dangers of drug and alcohol abuse in the workplace, the college’s policy of maintaining a drug-free workplace and a workplace that prohibits the illicit use of alcohol, available drug and alcohol counseling rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug and alcohol abuse violations.
B. Will make this policy/publication available to all students and employees. In addition, all faculty, staff, and all students will be notified of this policy through appropriate publications posted online.

C. Will notify each college employee and each student that, as a condition of employment on a federal grant or contract, the person, once so employed, must abide by the terms of the policy, and must notify his/her supervisor of any criminal drug statute conviction for a violation occurring in the workplace not later than 5 days after such conviction.

D. Will notify the appropriate federal agency within 10 days after receiving notice of criminal drug statute conviction of any college employee engaged in performance of the grant or contract.

E. Will impose sanctions on or require the satisfactory participation in a drug-abuse assistance or rehabilitation program by any employee so convicted. Sanctions imposed on employees for violation of this policy may include suspension, suspension without pay, and termination.

F. Will make a good-faith effort to continue to maintain an environment that complies with the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act of 1989.

G. Will conduct an annual review of its programs to assess the effectiveness, what changes need to be made, and to ensure the uniform application of sanctions to employees and students.

7. IMPLEMENTATION:

Implementation of this policy is a responsibility of the Office of Student Services. Notification of the program, including information about health risks and sanctions for violations of the policy, will be provided annually to students. In addition, the college is committed to monitoring and assessing the effectiveness of this program. An annual review of the program will be undertaken to (1) determine its effectiveness, what changes to the program if they are needed and 2) ensure that its disciplinary standards are consistently enforced.
